OMC will provide care, without discrimination, for emergency medical conditions regardless of a person’s ability to pay. Patients who are eligible for financial assistance—free or discounted (partial charity) care—under this program are any OMC patients with services on an inpatient or outpatient account, who are uninsured, underinsured, ineligible for a government program, or otherwise unable to pay for medically necessary care based on their individual financial situation. Financial assistance under this policy is available to residents of the hospital's service area.

“Charity” or “financial assistance” refers to healthcare services provided by OMC without charge or at a discount to qualifying patients. The following healthcare services are eligible for discounting under this policy:

A. Emergency medical services provided in an emergency room setting within our service area or outside in emergency situations
B. Services for a condition which, if not promptly treated, would lead to an adverse change in the health status of an individual, as defined by a physician
C. Non-elective services provided in response to life-threatening circumstances in a nonemergency room setting, as defined by a physician

Uninsured/Underinsured patients may be assisted with applications for other means of payment or financial assistance (e.g. Medicaid, other local funding programs) BEFORE approval for financial assistance.

**EXCLUDED SERVICES**

A. Cosmetic procedures and all associated costs related to provision of these services.
B. Audiology supplies, including hearing aids, hearing aid accessories and battery packs.
C. Retail Pharmacy, durable medical equipment, private duty nursing, ambulance services, bariatric surgery, and acupuncture
D. Services not covered or deemed medically necessary by the Medicare/Medicaid programs.

IV. **PROCEDURES**

A. **APPLICATION**
Patients may apply or reapply for financial assistance before, during or after care, or after collection agency assignment if their situation changes, by contacting a financial counselor at 417-257-6701 to make an appointment. Their office is on 8th St., West Plains, MO 65775. Financial assistance is also available in person through direct request at any of our facilities. Additional financial assistance information can be obtained through our website at www.ozarksmedicalcenter.com.

Insured patients with Medicare and/or commercial insurance may apply for financial assistance as a mechanism for secondary funding. Eligibility and discounting will be applicable under the provisions of this policy. Prompt-pay discounts are also available according to the guidelines within this policy. Payment plans may also be requested and may be granted according to this policy on a case-by-case basis.

It is preferred, but not required, that a request for charity and a determination of financial need occur prior to rendering of non-emergent medically necessary services. However, the determination may be done at any point in the collection cycle. The need for financial assistance shall be reevaluated at each subsequent time of service if the last financial evaluation was completed more than one year prior, or at any time additional information relevant to the eligibility of the patient for charity becomes known.

Patients who are uninsured and have a household income within 226% of the Federal Poverty Level (shown in the sliding scale table below) may receive financial assistance.

For uninsured patients we will provide a discount from the hospital’s regular billed charges to patients who do not have insurance. This includes patients whose financial situation normally would not otherwise qualify them for financial assistance.

Determinations for eligibility for financial assistance will require patients to submit a completed financial assistance application **Exhibit A** (including all documentation required by the application) and may require appointments or discussions with hospital financial counselors.

When determining patient eligibility, Ozarks Medical Center does not discriminate based on race, gender, age, sexual orientation, religious affiliation, and social or immigrant status. **PRESUMPTIVE ELIGIBILITY**
Additionally, Ozarks Medical Center may refer to or rely on external sources and/or other program enrollment resources if uninsured patients lack documentation that supports eligibility. For example, Ozarks Medical Center may provide financial assistance when:

1. Patient is homeless
2. Patient is eligible for other state or local assistance programs that are unfunded
3. Patient is eligible for food stamps or subsidized school lunch program
4. Patient is eligible for a state funded prescription medication program
5. Patient’s valid address is considered low-income or subsidized housing
6. Patient receives financial assistance from a community clinic and is referred to hospital for further treatment

Completed applications for financial assistance are accepted anytime during or up to 120 days after first billing statement.

Once a Financial Assistance determination is made, Financial Assistance is provided for all medically necessary services for 90 days with no additional information needed. All completed Financial Assistance applications under $10,000 are approved by the Director of Revenue Cycle. Financial Assistance applications over $10,000 require approval by the Vice President of Finance/CFO or designee.

B. Determining Discount Amount

Ozarks Medical Center will give uninsured patients a minimum 57% discount on gross charges for medically necessary or emergency care, reducing the amounts they owe to the amounts generally billed which are based upon the average of the amount that would have been paid to the hospital by private health insurers, Medicare and Medicaid.

To calculate this amount, Ozarks Medical Center uses the “look-back” method described in the IRS and Treasury’s proposed rules on the Patient Protection and Affordable Care Act (PPACA). Ozarks Medical Center re-calculates this discount percentage each year.

In following this method, Ozarks Medical Center used medical claims data from the past year to determine what portion of gross charges are typically paid (by the payer and the covered individual) for claims for emergency and medically necessary are where the primary payer was Medicare fee-for-service, Medicaid or a private commercial insurer.
